

Press Release

The St Luke's Remembrance garden continues to flourish, thanks to Plymouth Community Homes.

Plymouth Community homes have generously donated their time and skills to revamp the St Luke's remembrance garden.

Work has begun to extend the area so that more than one family at a time can enjoy the tranquillity of this special place. Part of the garden, which at present is unusable, will be levelled out. The garden will gain a few steps and a small seated area.

St Luke's Facilities Manager Pen Davies-Gregory said "The St Luke's remembrance garden is a very special and secluded place for quiet reflection; relatives will often visit the garden as an act of remembrance on their loved ones birthdays or anniversaries.

We are very grateful to Plymouth Community Homes for making the area much more accessible, giving more families the chance to enjoy the peace and quiet of the garden."

Everyone copes with bereavement in different ways. We may lose a loved one, but they live on in our hearts and memories. That is why this 'secret' garden was created in the grounds of the Hospice. Found at the bottom of a short path, it is a serene place with a waterfall, pond and pebble garden.

Many visitors choose to purchase a pebble engraved with their loved ones name to place in the garden or to take home as a lasting tribute, if you would like more information about this please call Supporter Relations at St Luke's Hospice on: 01752 401172.
